SUMMARY

Computer Science graduate with a Bachelor of Science and a strong foundation in software development, backend systems, and problem-solving. Experienced in building Java-based applications, RESTful APIs, and database-driven systems using Spring Boot and SQL. Brings strong discipline, documentation skills, and reliability developed in high-responsibility professional environments. Seeking an entry-level Software Engineer role to design, build, and maintain scalable, maintainable software solutions.

TECHNICAL SKILLS

- **Programming:** Java, C, C++, Python, JavaScript, SQL,
- **Frameworks & APIs:** Spring Boot, RESTful APIs, JDBC, Hibernate/JPA
- **Databases:** MySQL, PostgreSQL, Oracle
- **Tools:** Git, GitHub, Maven, Docker (introductory), IntelliJ IDEA, VS Code
- **Operating Systems:** Linux (Ubuntu, Debian), OpenBSD
- **Systems & Networking:** Virtualization (Proxmox, VMware), access control, system hardening
- **Practices:** OOP, debugging, secure coding fundamentals, Agile/Scrum, documentation

ACADEMIC PROJECTS & TECHNICAL EXPERIENCE

- **Systems & Security Labs (Linux):**
  Configured and hardened Linux systems, implemented access controls, analyzed vulnerabilities, and documented findings in controlled lab settings.
- **Virtualized Infrastructure Labs:**
  Built and managed virtual machines with Proxmox and VMware to simulate production-like IT environments.
- **Operating Systems Coursework:**
  Exposure to kernel concepts, concurrency, scheduling, and systems-level programming.
- **Backend REST API Development (Java, Spring Boot):**
  Designed and implemented RESTful services with CRUD operations, input validation, and relational database integration (MySQL/PostgreSQL).

WORK HISTORY

Security Officer	**Blackstone Consulting, Inc**	**Feb 2017-Present**
Security Officer	**Securitas Security Services USA, Inc.**	**March 2016-May 2017**

Education

Bachelor of Science in Computer Science	**San Diego, CA**	**December 2025**
